

Thank you for your recent referral to Vermilion. We're delighted to have you onboard!

Scotland's dental referral scene is at an interesting juncture. At Vermilion, we are acutely aware that we must never rest on our laurels. There are now several dentists offering a referral service and our many loyal referring dentists have a choice to whom they can refer their patients for treatment.

At Vermilion, we never claim to be the best or the most specialist. What we do is always put our patients first and strive to give them an exceptional dental service which in turn makes them feel happy and satisfied with the trust they put into our team.

We also never ever take our referring dentists for granted. We remain extremely grateful for each and every referral that we receive and do our utmost to ensure that our expertise, our care and our passion translate into the best outcome for the patient.

We hope that by reading this newsletter, you will understand that the investment that we have made in our product, our people and our service is not to be perceived as a grand statement, but as a necessity. The dental scene is ever evolving, and through increasing our space, recruiting new talent, constantly researching and analysing our clinical work, surveying our dentists, asking for feedback, encouraging our own people to reach their full potential and treating our referring dentists as co-partners all play a vital part in raising our game.

Humility, understanding and commitment are just some of our values at Vermilion and, above all, we aim to always give it our best and do the right thing by our referring dentists and their patients.

Welcome to No. 50 St John's Road

No. 50 is open for business! This houses our Edinburgh dental hygiene service as undertaken by our two wonderful hygienists Colette and Michaela. The ethos behind No. 50 is about constantly improving our service to our referring dentists and their patients. The new facility has also been set up as a dedicated admin hub where all treatment letters and patient correspondence are generated.

Our original clinic, just along the street at no. 24, continues to welcome referred patients for all other services including restorative dentistry, oral surgery, endodontics, periodontics, orthodontics and dental implant maintenance and after care.

Refer & Restore Course

Our popular Refer & Restore CPD programme relaunched last month. Don't worry if you'd like to join in, as we are running a second course next spring. There is one space left. If you are interested, please register by emailing our events coordinator at events@vermilion.co.uk.

Audit & Research - Oral Surgery

A research and audit collaboration between Vermilion, Glasgow Dental Hospital & School and Griffith University School of Dentistry & Oral Health has led to a paper being submitted to Oral Surgery on the safety and efficacy of intravenous sedation using midazolam only or combinations of two or three drugs.
